Introduction

1. In its latest reply to the note of the Secretary-General of UNCTAD dated 23 May 1986, the Government of Japan provided information on total, dutiable, covered and preferential imports of products falling within the Harmonized Commodity Description and Coding System (HS) chapters 1 to 24 and 25 to 97 from beneficiaries of its schemes of generalized system of preferences for fiscal year 1991.1/

Imports by Japan from beneficiaries of its scheme in fiscal year 1991

2. The table below shows the total of the above-mentioned categories of imports from all beneficiaries and various groups of beneficiaries. In fiscal year 1991, imports were recorded from 152 beneficiaries of which 14 did not have MFN dutiable trade while another 16 had MFN dutiable trade not covered by the scheme, leaving 122 which supplied goods covered by the scheme, of which 93 actually received preferential treatment.2/

3. As may be seen from the table, total Japanese imports for all supplying beneficiaries amounted to $111 billion in fiscal year 19913/ which represented 48.5 per cent of total imports from all sources ($228.8 billion). Some $94.4 billion or 85 per cent of these imports consisted of industrial products in HS chapters 25 to 97, with the remaining $16.6 billion or 15 per cent accounted for by agricultural products in HS chapters 1 to 24. Dutiable imports accounted for $71.7 billion or 64.6 per cent of these total imports. Imports covered by the scheme amounted to $25.4 billion or 35.4 per cent of dutiable imports. About 47.5 per cent ($12.1 billion) of these covered imports received preferential treatment. Industrial products constituted the bulk ($9.2 billion or 76.5 per cent) of imports which actually received GSP treatment.

4. The rate of utilization (i.e. preferential imports as a percentage of covered products) amounted to 47.5 per cent, while the rate of agricultural and industrial products amounted to 90.3 per cent and 41.5 per cent, respectively. The relatively higher rate of utilization for agricultural products can be explained by the absence of *a priori* limitations contained in chapters 1-24.

5. Eight major beneficiary suppliers accounted for $60.6 billion or 54.6 per cent of total Japanese imports from all beneficiaries. Some $35.6 billion or 58.8 per cent of these total imports were dutiable, of which $20.4 billion or 53.7 per cent were imports covered by the scheme. Some 44 per cent ($9 billion) of these covered imports actually received preferential treatment. These eight major beneficiaries supplied 80.4 per cent and 74.1 per cent of covered and preferential imports from all beneficiaries. Ranked by order of value of trade covered by the scheme, these major supplying beneficiaries were: China, Republic of Korea, Taiwan (Province of China), Thailand, Brazil, Hong Kong, Indonesia and the Philippines. The first three major beneficiary suppliers above accounted for 62.6 per cent and 53.9 per cent of covered and preferential imports from all beneficiaries.

6. Japanese imports of covered products from ACP and Mediterranean countries,4/ which enjoy special tariff preferences in the EEC market, amounted to $588 million and $371 million, respectively, which altogether represented 3.8 per cent of total covered imports from all beneficiaries. However, the rate of utilization, which amounted to 68.3 per cent, is higher than the average of that in favour of all beneficiary suppliers seen above.

7. The table also indicates that Japan recorded imports from 43 least developed countries (LDCs) amounting to $1,124 million of which $726 million or 64.6 per cent were dutiable. Of these dutiable imports $459 million or 63.2 per cent were covered by the scheme and $239 million actually received preferences. The rate of utilization amounted to 52.1 per cent. Of the 43 LDCs exporting to Japan in 1991, five did not have dutiable imports,[5/] seven others did not have imports covered by the scheme[6/] and, of the remaining 31 which supplied goods eligible for preferential treatment, nine failed to receive it.[7/]

8. Thus, the following 22 LDCs (listed in order of their covered exports) actually benefited from the scheme: Zambia, Mauritania, Bangladesh, Gambia, Zaire, Tanzania, Cambodia, Bolivia, Nepal, Burma, Ethiopia, Laos, Malawi, Haiti, Sudan, Afghanistan, Lesotho, Madagascar, Rwanda, Maldives, Burkina Faso and Bhutan. The first four LDCs together supplied 93.9 per cent and 92.9 per cent of covered and preferential imports, respectively.

Major products imported under the scheme in fiscal year 1991

9. In the annex table B shows the value of Japan's imports in fiscal year 1991 of (I) agricultural products and (II) industrial products covered by its scheme as defined at the HS 4-digit level from the world and beneficiary suppliers as well as the value of imports of these products which effectively received preferential treatment.

10. Imports of major products from beneficiaries in 1991 amounted to $20.5 billion or 80.8 per cent of the total covered ($25.4 billion), of which imports of major agricultural products from beneficiaries amounted to $2.6 billion or 83.1 per cent of the toal covered ($3.1 billion), while imports of major industrial products amounted to $17.9 billion or 80.5 per cent of the total covered imports ($22.3 billion) in 1991. Some 85.7 per cent of these agricultural products in fiscal year 1991 received preferential treatment. The rate of utilization was almost 66 per cent in fiscal year 1991 in the case of industrial products.

11. The following 10 agricultural products as defined at the HS 4-digit level represented the most important items among these categories in fiscal year 1991: HS 16.04 Prepared or preserved fish ($717 million); HS 03.07 Molluscs ($617 million); HS 08.03 Bananas ($454 million); HS 16.05 Crustaceans, molluscs prepared ($299 million); HS 15.11 Palm oils ($124 million); HS 07.12 Dried vegetables ($120 million); HS 07.09 Other vegetables ($78 million); HS 12.11 Plants and parts of plants ($78 million); HS 06.03 Cut flowers ($62 million); HS 21.01 Extracts of coffee, tea ($60 million).
